

Personal Injury Compensation

Personal Injury Resource

How can I get started?

If you've been injured, you should contact Hooper Law as soon as possible because the longer you wait, the more likely it will be that your memories (and the memories of any witnesses) will fade concerning the exact details of the events. Other evidence to support your case may also be more difficult to obtain as time passes.

Once you've contacted us we will arrange a time for you to meet one of our personal injury lawyers at our office or, if getting to our office is not possible, we can also meet you at your home or hospital. We will review your case and advise the best way to proceed for your unique circumstances.

Why work with Hooper Law?

Personal injury law is a specialized field and not every law office has the professionals with the knowledge needed in that area to help their clients get the best possible outcome. But at Hooper Law, personal injury law is our specialty.

Our team of lawyers and legal professionals do what they do because we care about our clients and we want to see them get the compensation they deserve and need for their recovery. Not only that, we have an excellent track record in fighting – and winning – battles for our clients. In fact, we have a 98% success rate in court, and that success rate in court also helps us to negotiate favourable settlements for our clients outside of court.

What can I be compensated for?

If you have been hurt because of someone else's negligence, you probably know that you may be entitled to compensation for your medical expenses. What you may not realize, is that you may also be entitled to compensation for other costs such as lost wages, childcare and modifications that you might need for your home or vehicle.

Estimating the true cost of an injury can be difficult. The experienced personal injury lawyers at Hooper Law will research your case and fight on your behalf to help ensure that you are paid the funds you are entitled to – so you can focus on your recovery rather than worry about financial challenges.

Why you should contact Hooper Law

Some people may hesitate to contact a personal injury lawyer because they feel that they have not been hurt that badly or that going through the court process is simply too much of a hassle. Sometimes the extent of an injury isn't always realized right after an accident. And the costs associated with injuries are frequently underestimated in the beginning. If you have been hurt as the result of someone else's carelessness, it is important to consult with a legal professional as soon as possible while the details of the event are still fresh in your mind. If you are not able to come to our office, a member of our team can meet with you at your home, hospital or other convenient location.

Are you entitled to compensation?

Our clients receiving the proper compensation is at the heart of every personal injury case. But before our Personal Injury Lawyers can answer this question, we will need to meet with you and learn the specific facts of your case.

Please contact Hooper Law for a free, no-commitment initial consultation on our fightforyou help-line at 905-522-8002, or fill out the contact form on our website.

Once you've contacted us we will arrange a time for you to meet one of our personal injury lawyers at our office, or if that is not possible, we can also meet you at your home or hospital. We will review your case and advise the best way to proceed for your unique circumstance.
